CGM LYTEC MD 2022 Hardware and Software Requirements

This guide identifies the hardware and software requirements for CGM LYTEC MD 2022.

Application Server

The following table lists the hardware requirements for application servers.

CPU (Processor)	Intel Dual Core Xeon 2.0GHz
RAM (Memory)	4GB
Storage Array Type	RAID-5 or SAN
Optical Drive	DVD-ROM
Network Card (NIC)	1Gbps

For smaller customers, these specifications will support up to 10 thin client users and the CGM LYTEC MD application folder.

Database Server (SQL)

The following table lists the hardware requirements for SQL database servers.

CPU (Processor)	Dual Intel Quad Core Xeon 2.0GHz
RAM (Memory)	8GB (16GB for 300-1000 users; 32GB for 1000+ users)
Storage Array Type	RAID-1 and RAID-10 or SAN
Optical Drive	DVD-ROM

SQL servers require multiple RAID arrays. One array is for the database files; the other is for either transaction logs (SQL). eMDs recommends a third array for the operating system.

These specifications are for a single production database. Additional databases (testing, training, production) require, at a minimum, an increase in RAM. Contact eMDs Support for further information.
