Chapter 1 - Resolved Issues

This update is for RM 2824 ONLY, meaning only CGM MEDISOFT 28 and CGM LYTEC 2024 installations can download and install it.

The following issues were resolved and changes made with this update.

Ite m Number	Application	Description
157340	CGM MEDISOFT/ CGM LYTEC	Change usage type for several loops/segments in 270 eligibility request IGuide. When the insurance policy holder and patient are two different people (e.g.: two spouses or parent-child, etc.), some of the policy holder's information in the 2000C loop of the 270 eligibility request IGuide is not required and can be omitted. However, it is presently marked as required in Revenue Management, so it will always send the policy holder's information regardless. Some of this info is redundant as Revenue Management also sends it for the patient loop (2000D).
161562	CGM MEDISOFT/ CGM LYTEC	Error when closing a 997 report from eMEDIX. Added logic to check for existence of pdf file before attempting to move it from SendClaim directory to archive directory.
149723	CGM MEDISOFT	270 eligibility IGuide 2000C HL04 ignoring mapping and always outputting "0" value. Re-ordered 5010 MS28 IGuide to the appropriate order.
